## About the Founder

Greg Allen  
*Founder*

Greg Allen has founded several technology based companies and participated in a broad spectrum of demanding projects covering all aspects of communication, SCADA and security system requirements. Greg holds a degree in Telecommunication Engineering, is a member of ASIS (American Society for Industrial Security) and is well versed with current leading edge technologies and best practices used to provide comprehensive solutions to a wide range of requirements. Greg has designed systems and deployed secure wireless free space laser and microwave systems along with sophisticated security systems covering CCTV, advanced imaging, analytics and intrusion detection. Greg has consulted and supplied security equipment for Industrial Projects, large Shopping Malls and sensitive Military applications. Greg is the founder of Eco Technologies Inc. which represents leading edge manufacturers of a wide variety of 'Best in Class' security technologies and software solutions to provide an open architecture and well integrated solution to address any security or industrial requirement.
